About This Document: This visual walkthrough presents the actual user interfaces and workflows of the Recipe App. Organized into **Admin Management** (catalog operations, statistics, HTTPS URL integration) followed by the **Audience Experience** (discovery, live category filtering, dynamic scaling, cloud favorites, shopping list, and reviews).

1. Authentication & Admin Operations

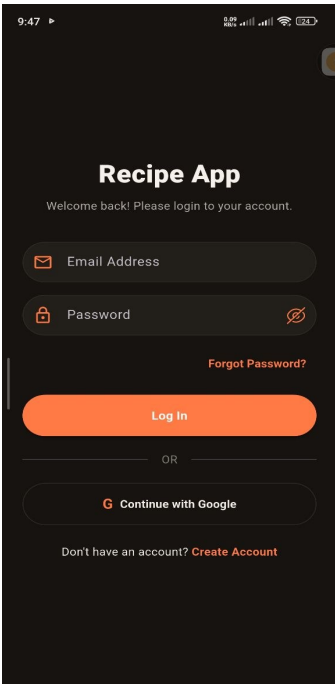

Figure 1: Authentication & Login Screen
Secure Firebase Auth supporting email/password and Google Sign-In.

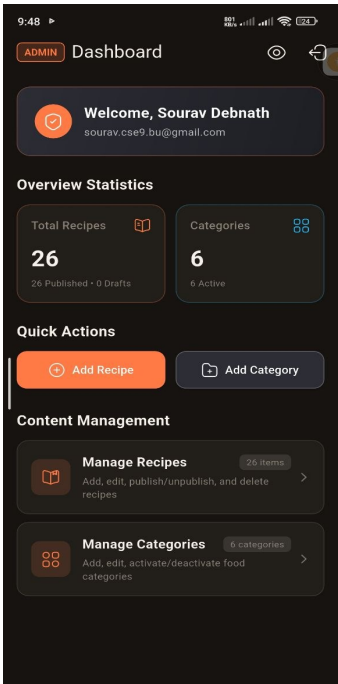

Figure 2: Admin Dashboard & Statistics
Overview of published recipes, active categories, and quick management actions.

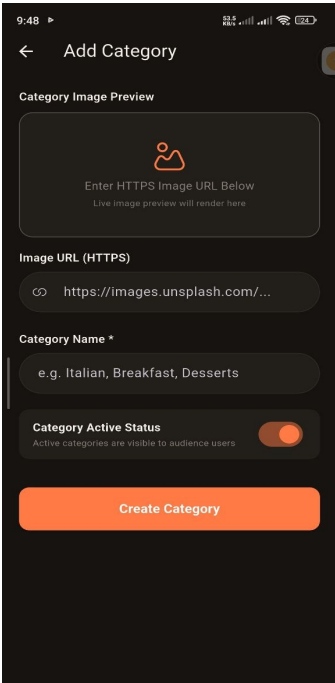

Figure 3: Add Category (HTTPS URL)
Category creator with live HTTPS image URL preview and visibility toggle.

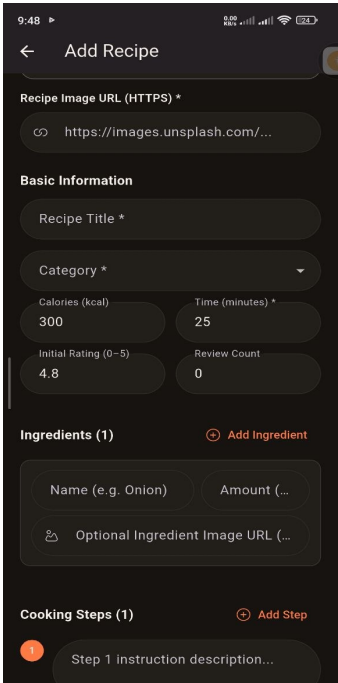

Figure 4: Add Recipe (Multi-Field Form)
Recipe editor with HTTPS image, calories, time, ingredients, and steps.

2. Admin Shortcut & Audience Home Discovery

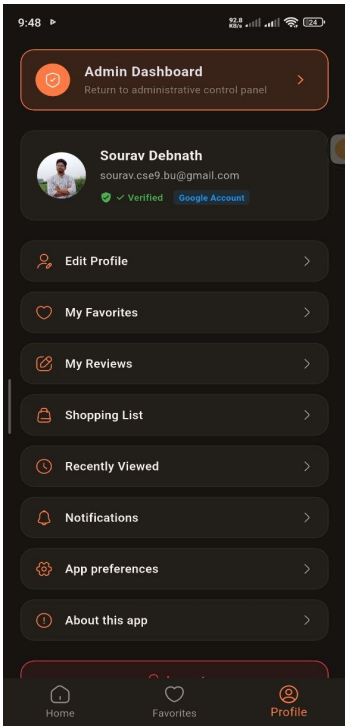

Figure 5: Admin Profile & Shortcut Banner
Profile with special top banner shortcut to access Admin Dashboard.

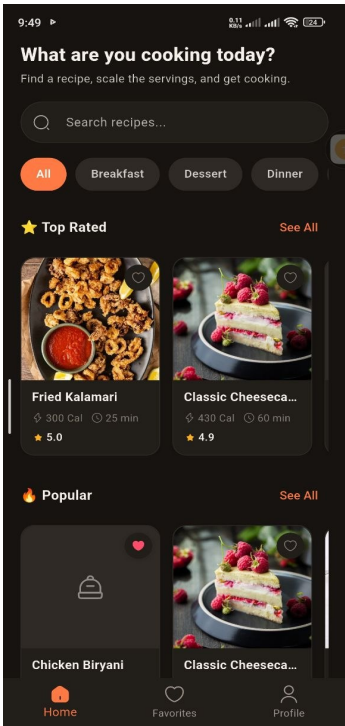

Figure 6: Home — Top Rated & Popular
Discovery feed with curated carousels for Top Rated and Popular recipes.

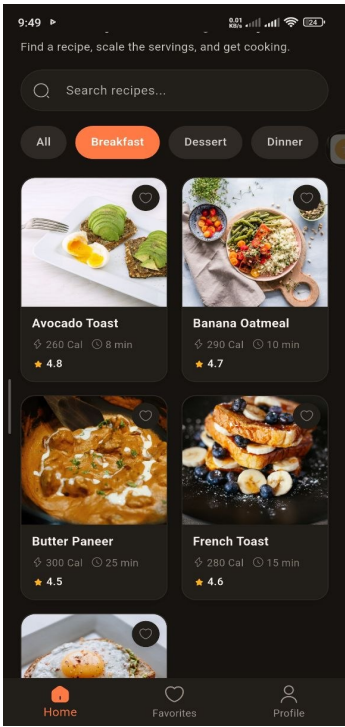

Figure 7: Breakfast Category Feed
Real-time Firestore stream filtered by Breakfast category.

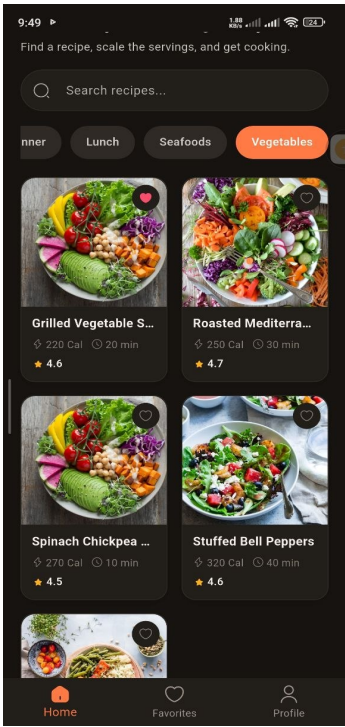

Figure 8: Vegetables Category Feed
Category filtering showcasing healthy meals with calorie and time indicators.

3. User Favorites, Profile Hub & Recipe Detail View

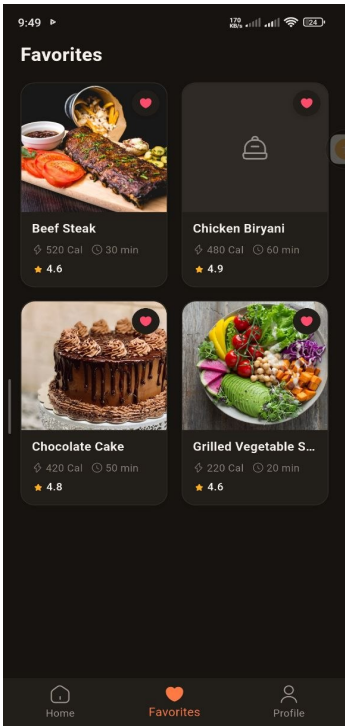

Figure 9: Synchronized Favorites Screen
Cloud-synced bookmarks allowing users to access favorite recipes anywhere.

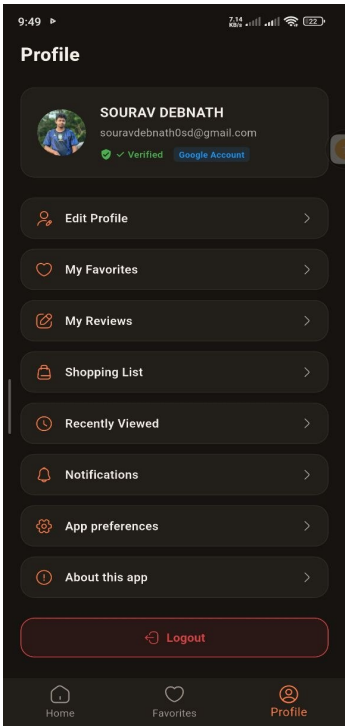

Figure 10: Audience User Profile Hub
Standard user profile displaying Google verification badge and settings.

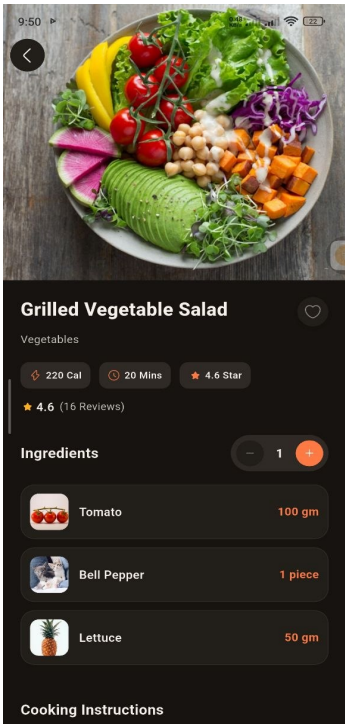

Figure 11: Recipe Detail & Serving Scaler
Nutritional info, rating, and dynamic +/- serving multiplier algorithm.

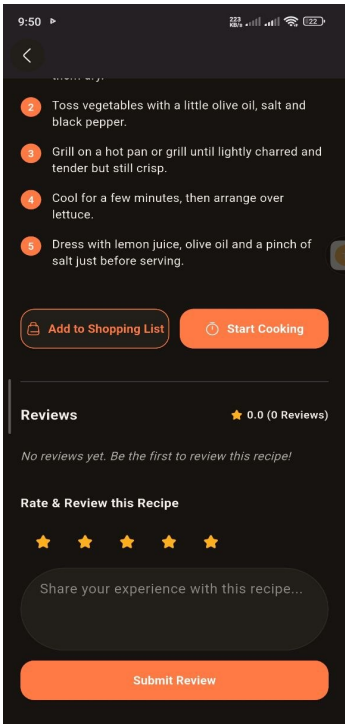

Figure 12: Cooking Steps, Timer & Reviews
Step-by-step instructions, Shopping list button, timer, and review form.

4. App Preferences, Profile Editing & User Productivity

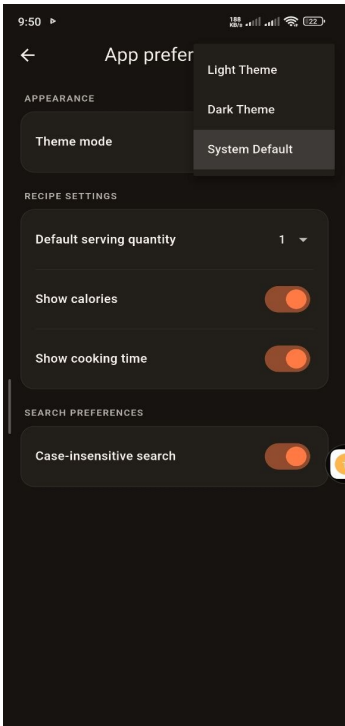

Figure 13: App Preferences & Themes
Theme Mode selection (Light/Dark/System) and default serving configuration.

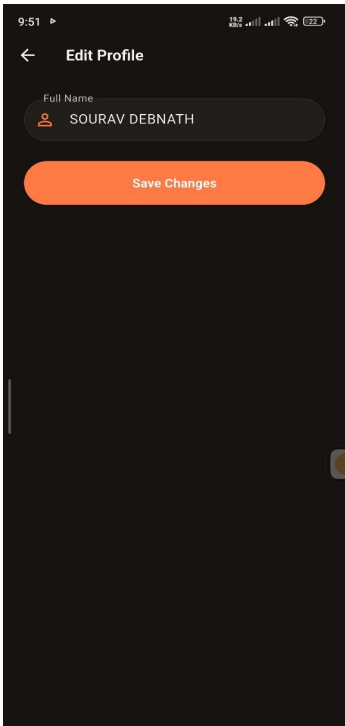

Figure 14: Edit User Profile Screen
User display name customization persisted directly to Cloud Firestore.

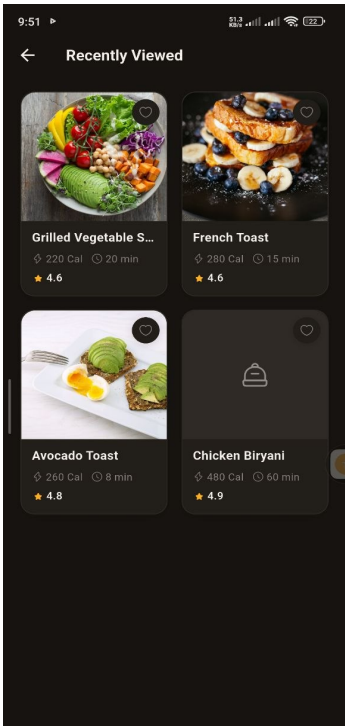

Figure 15: Recently Viewed History
Local history tracker recording recently inspected recipes.

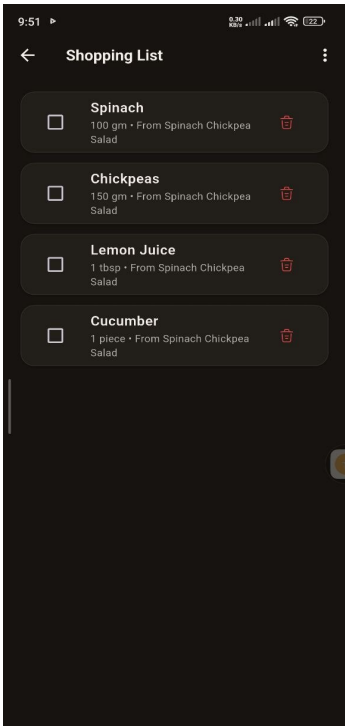

Figure 16: Smart Shopping List Checklist
Interactive grocery checklist populated from recipes with delete actions.

5. Notifications, User Reviews & Technical Summary

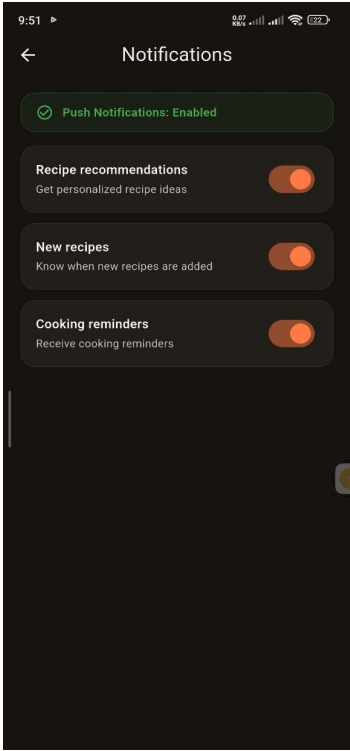

Figure 17: Push Notifications Settings
Notification preference toggles for recommendations, new recipes, and reminders.

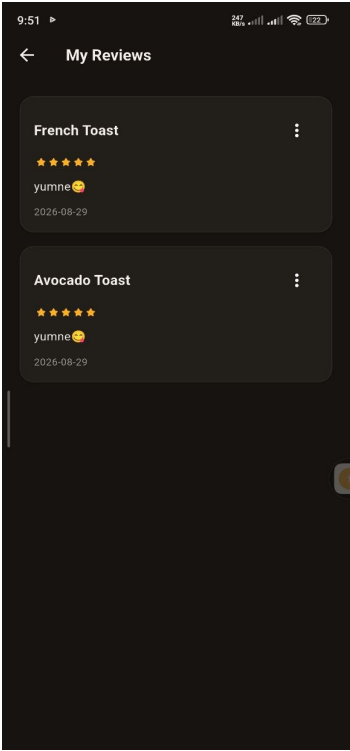

Figure 18: My Reviews & Ratings History
Personal reviews management hub showing all user-submitted ratings.

Feature / Component	Implementation Detail	Status
Role-Based Access	Admin (Custom Claims) can create/edit; Audience has public read access	VERIFIED
Cloud Persistence	Firebase Cloud Firestore with real-time snapshot streams & offline cache	VERIFIED
Image Delivery	External HTTPS URL validation with zero Firebase Storage cost (Spark Plan)	VERIFIED
Automated Tests	54 automated unit, model, and navigation widget tests passing	54 / 54 PASS
